

Portable Heater

Safer than traditional "Over the Side" heaters !

New from Fiberglass Specialties, Inc is a safe, truly portable heater that is perfect for portables and even small in-place pools. The new heater can fill, drain, and heat the baptismal pool using a 120v or 240v power source. **Because this is a full featured circulation heater, it will heat the pool much faster than a traditional "over the side" heater and save on electricity costs.**

120 unit shown
