Attn: Mr. Mike Minor

RE: First Congregational Church
Whitman, MA

Dear Mike:

Our firm has been involved in many historical preservation/renovation projects throughout New England for forty years. Many of these projects involve our old New England churches and their steeples.

Recently, we replaced the steeple on the First Congregational Church, in Whitman, Massachusetts. We are enclosing "before" and "after" photographs. The building committee, along with our architect and this office, unanimously voted to utilize fiberglass over aluminum. Among the reasons noted, were appearance, compatibility with the existing structure, maintenance and the like.

The completed results have elicited many favorable and positive expressions. Townspeople enjoy the fact that this replicates the old steeple and once again places this building among the proper architecture of the period in which it was originally built, and an asset to the community.

We look forward to recommending your steeples in the future on any of our projects.

Yours very truly,

A. P. WHITAKER & SONS, INC.
